Code Robot Quick Facts

What Code Robot does
Code Robot generates Apex code from existing data in your org. Developers pick any number of records and collect them in a project. A simple click will generate deployable, readable Apex test code ready to use in the tests. Bulk inserts and the relationships within the project are handled by Code Robot.

Benefits for the Developer.
Depending on personal and organizational quality standards, Code Robot will save between 5% and 30% of coding time as it drastically simplifies the tedious task of setting up the data for test cases.
We will leave it up to you to decide whether the time savings translate into higher productivity, better test coverage and code quality or a reduction of your developers' stress level ☺

Benefits for the Organization
Code Robot will inevitably and (we think) obviously result in significant time savings and quality improvements. Salesforce code simply gets better with more passing unit tests that hit more data variations.

Pricing
A single user Enterprise license starts at $83 per user and month, for a Consulting license $108 with a yearly commitment ($100/$130 for month-to-month). Volume pricing is available.
The Enterprise license is for developers working within one production ORG and works with any number of development and test environments.
The consulting license is designed for users working with many different production, test and development ORGs.

Code Robot Trial
After the installation, Code Robot is fully functional for limited number of invocations and display a trial mode message in the user interface:

Purchase Code Robot
You can purchase Code Robot on our website https://code-robot.com.
Our shopping cart supports month-to-month subscriptions via credit cards and yearly subscriptions via credit cards and check/wire transfers.

Security
Code Robot operates in read-only mode and never alters or creates data in the environment it executes in.

Privacy
As an essential part of its functionality, Code Robot sends user and usage information to our CRM server.
Code Robot sends only aggregated information. Neither the data in your ORG nor the generated code is ever transmitted to us.
